

FAQ's

Q: How long will the procedure take?

A: Sometimes a partial can be delivered in as little as two visits, but usually the average is 4 visits. Approximately two to six weeks.

Q: Will it hurt?

A: Partial dentures fabricated from *tcs® Unbreakable* are non-invasive, so there is minimal discomfort. Sometimes preparations to the abutment teeth are necessary, but there is little discomfort associated with this procedure.

Q: How long will my *tcs® Unbreakable* partial denture last?

A: A *tcs® Unbreakable* is designed to last a lifetime. Should modifications be needed as time goes by due to natural changes in your mouth, your *tcs® Unbreakable* partial denture can usually be modified rather than replaced.

Q: Can I wear my denture at night?

A: Some designs of partial dentures may not be recommended for overnight use. Ask your dentist.

Q: Will I have difficulty chewing?

A: Some foods may never be easy to chew with dentures, but a properly designed and fitted partial denture combined with *tcs® Unbreakable's* durability and superior adaptation will give you the best chewing experience of any denture material available.

Q: Will the partial change how I speak?

A: Sometimes it is difficult to speak clearly with missing teeth, therefore, the partial may improve your speech clarity. If you find it difficult to pronounce certain words, do not worry, over time you will become accustomed to speaking properly with your *tcs® Unbreakable* partial denture.

Q: Can I make minor adjustments to my partial denture?

A: We strongly recommend that you do not alter your partial in any way. If adjustments need to be made, please see your dentist.

Proper Care of Your New *tcs® Unbreakable* Appliance

Oral Health plays a vital role in our general well-being.

tcs® Unbreakable partials are fabricated from an advanced biocompatible nylon thermoplastic. They are very easy to care for. In order to keep your restoration looking and feeling like new, please follow these simple recommendations:

1. Continue to brush your natural teeth and gums as directed by your dentist.
2. Clean your restoration daily. Simply rinse your restoration under warm running water for approximately 15 to 30 seconds in order to remove any food particles prior to soaking it in the denture cleaner.
3. With a very soft denture brush, brush your restoration using water only. Rinse again.
4. Place your restoration in *tcs® Dental Appliance Cleaner* for at least 15 minutes per day.
5. Keep your restoration in water or denture solution when you are not wearing it.
6. DO NOT use bleach, toothpaste or similar cleaning products as these may scratch the surface and change the color of your restoration.

*Please remember that although *tcs® Unbreakable* is guaranteed unbreakable, the teeth are not. Please handle your partial with care.*

If you are missing one or more teeth and are looking into replacement options, luckily you have plenty of choices. You don't have to worry about a partial denture compromising your smile. Today, breakthroughs in dental technology give your dentist a great deal to offer you. When it comes to deciding on a replacement, many things are considered, i.e. cost, procedure, aesthetics, etc. These dental care decisions should always be made in consultation with your dentist. However, for many patients that do not want the unreliability of temporary appliances such as flippers, revealing partials such as acrylic with metal clasps, or expensive options like implants that require highly invasive surgery and long healing periods, *tcs® Unbreakable* partials may be the ideal choice.

Look and feel your best with
tcs® Unbreakable

TRUE LIFE STORIES

Tiffany ... a young, athletic woman in her early thirties from California lost most of her teeth in an automobile accident at the age of 12. Fortunately, Tiffany does not remember the accident, however, she does sadly remember the endless days in the hospital and the five months she attended school with most of her upper teeth missing. When she finally received her partial denture, she refused to wear it because it felt so awkward. She says she felt uncomfortable with or without it. It was a no-win situation. After many years of wearing an uncomfortable metal and acrylic partial denture that would constantly break at the most unfortunate moments, Tiffany was finally prescribed a *tcs® Unbreakable*. Tiffany is excited about finally wearing something she can count on, look great, and feel even better.

Carlos... I contemplated between a fixed restoration and a removable partial for weeks. When my temporaries would no longer hold up I knew that I had to make a decision. It wasn't easy, but I decided to go with a removable partial. My reason being mostly motivated by my low threshold for pain. The procedure was quick and easy and most importantly painless. Best of all, nobody can tell that I wear a partial.

What is TCS?

tcs® Unbreakable partials are made out of a biocompatible, pure nylon material that is non-toxic and contains no BPA or unsightly metal clasps. With unique physical properties, flexibility, color, and stability, the functionality of *tcs® Unbreakable* helps preserve existing teeth. *tcs® Unbreakable* restorations adjust and flex with the contours of your mouth as you chew, talk, and smile.

Comfort

- Partial adjust and flex with the natural contours of your mouth.
- Lightweight and thin for optimal comfort.
- Fabricated using high pressure injection for a precise fit.

Reliable:

- Biocompatible and ideal for patients allergic to acrylics and monomer.
- Guaranteed unbreakable.
- Non-invasive treatment.
- Ideal transitional restoration during the healing period of implants.

Natural Looking

- Natural hue allows the appliance to simulate real gums and teeth more organically.
- Unsightly metal clasps are gone forever. *tcs® Unbreakable* partials are designed using tissue colored clasps for a natural appearance.
- Designed thin to avoid awkward bulkiness of conventional partial dentures.

tcs® Unbreakable is featured in "Improving Lives through Effective Dental Solutions," a 5 minute health brief hosted by Terry Bradshaw.

tcs® Unbreakable in Combination with Metal Substructure:

In some cases a metal substructure is recommended in conjunction with *tcs® Unbreakable*, particularly when several teeth are missing from both sides of the back of your mouth. But don't worry, the partial is still undetectable because the clasps are still fabricated using *tcs® Unbreakable* tissue colored material. Your dentist will choose the design that works best for your particular needs.

Implant Patients

Implant treatment can take up to 6 months, *tcs® Unbreakable* partials are ideal as a transitional restoration during the healing period prior to insertion of your implant. With *tcs® Unbreakable* you do not have to feel self-conscious nor uncomfortable during this treatment period.

tcs® Fresh Line: A clean, bacteria free appliance is vital to your health and to the appearance and longevity of your appliance. TCS offers a variety of products designed to keep your appliance looking and feeling like new! www.tcsfresh.com
